Meet Chad! He stopped by to speak to our newest class of Nurse Aide students. Chad shared his story of how hard it was for him to accept help and come to New Hope. Nervous and unsure, he bravely stepped through New Hope's doors and immediately felt at ease. He was amazed at how much the classes prepared him for the next step - the clinical program.

"New Hope gave me hope in my heart!"

Chad always had a passion for nursing that started at a young age when he helped his ailing mother. He feels he is honoring his mother's memory as a nurse. She would be so proud to know of his accomplishment and that he graduated the clinical program with honors! Thank you for supporting our workforce development programs that place hope back in the hearts of our guests!
Our wonderful friends at Thrivent have been busy! They worked on some landscaping at the back of the Dillsburg Center and added a fresh coat of paint on the floor of our mobile food pantry trailer. Amazing and so very appreciated!!

Did you catch Executive Director Eric Saunders on Good Day PA on ABC27? You can watch it by visiting our Facebook page or by visiting ABC27.com. Eric talked about how New Hope helps people with job training and finding a career path. It was wonderful to share news about our programs. If you know someone who needs help finding a job, please send them our way!

Blessings abound! New Hope received a special grant through the Emergency Food and Shelter Program, managed locally by the United Way of York County, to purchase pallets of diapers for families with young children in York County. As anyone with an infant knows, diapers can be very costly, so this is a wonderful blessing for our guests!

Words from a grateful guest

“I am so thankful you were there for me and my son. You helped us get through a rough patch, without any question or reservation. We are so grateful there are kind hearted people in this world, like yourselves, to help those in need.”

This sweet note included a lovely financial gift to New Hope. What a joy to see our guests back on their feet again and paying it forward to help others in need!
